

Food Industry

Paperless Business Compliance

Real-time data, aligned with full traceability creates increased profitability & customer confidence.

APPLIED ✓
principles

Quality assurance. Increased productivity.

Applied Principles has been a trusted technology partner in the food manufacturing industry since 2008.

Our real-time data capture software ensures consistent product quality, from raw material intake through to finished product shipment. We help create a safe environment for employees whilst boosting operational efficiency.

In an industry where compromise is not an option, we are proud to have helped a diverse range of manufacturers achieve BRC, HACCP and GMP standards. Happy customers range from those with as little as 10 employees to multiple site organisations capturing over 2500 tasks per day with hundreds of users.

Real time and consistent business process management.

Applied Principles arm you with the technology to continuously improve the consistent quality culture throughout your business, promoting increased productivity, profitability and safety.

The software's flexibility makes it suitable for any organisation in need of consistent business process compliance, including the mining, ferroalloys, food, engineering and manufacturing industries; covering quality management, production, auditing, maintenance and health & safety.

Each department can develop customisable checks, tests, inspections, audits and workflows. Including immediate corrective actions with photos, signatures and alerts, all performed in real time.

The insights gained will put your management team in a position to make dynamic business-critical decisions, based on the consistent business process data the system generates.

How can we help you today?

AUDITING & COMPLIANCE

- BRC Audits
- GMP Audits
- Supplier Audits

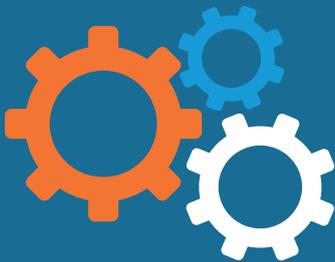

QUALITY MANAGEMENT

- Raw Material Intake

- Shift start-up checks
- Metal Detector Checks
 - Traceability
- Average Weight Checks
- Standard Operating Procedures
- Order picking

HEALTH & SAFETY

- Near Miss Accidents
- Risk Assessments
- Health & Safety Audits

SETTING THE STANDARD

Principle Suite is helping our customers maintain BRC, ISO & SALSA accreditations.

CUSTOMER CONFIDENCE

Principle Suite earns the trust of your customers by providing an unprecedented level of consistency.

“ The level of 'noise' about quality has risen perceptibly, from the canteen to the factory floor. The system forces everybody to be accountable and take pride in what we produce, and because the system creates a uniformity of standards across shifts, everyone is working to the same goal. ”

Jill Tolan

Technical Manager at Morrisons Manufacturing

Industry specific customers

- GROWING / PROCESSING OF SALADS & VEGETABLES
- SEAFOOD PROCESSING
- RED MEAT PROCESSING
- POULTRY PROCESSING
- SOUPS
- YOGHURTS
- JUICES
- READY MEALS
- BAKERY
- EGG PACKING
- BAKING INDUSTRY INGREDIENTS
- CONFECTIONERY FILLINGS & SAUCES

APPLIED principles

“ The team at Applied Principles thoroughly understood the brief and delivered a user-friendly system, which also gave the control we required. The AP team worked tirelessly to ensure that the launch date was achieved and go live was without incident. Throughout the entire project they demonstrated agility and flexibility, no request went unanswered. ”

About Us

After almost 15 years of partnering with some of the biggest names out there, we know what works for our customers and exactly what they expect from us..

From our head office in the United Kingdom, and our branch office in South Africa, we work directly with the majority of our customers. We also have a small number of specialised business partners that can supply our software.

It has always been our belief that the customer should retain full control of their own processes and data, without the need for ongoing consultancy and configuration costs.

Our software is
a representation of us
and everything we stand for.

Implementation & Support

Our consultants partner closely with you throughout the scoping, installation, training and implementation processes. Our dedicated development team ensure software optimisation resulting in minimal installation and storage requirements.

We guide you through implementation and teach you how to convert your existing paperwork into a digital process, including how to design further workflow processes for non-conformances.

Post implementation you're able to totally customise the solution to best meet your needs and our expert support team is always on hand to offer further support as required.

Your partner, not just your service provider.

“ It has been a pleasure working with the team at Applied Principles. On our request the system was fully implemented at our Liverpool site within a very tight timescale of only 4 weeks! Principle Suite is providing us the technology required to continuously improve on a consistent quality culture throughout the business. ”

David Elmer

Operations Director,
Puratos, UK

Why choose us?

Our implementation, software and support is second to none

SIMPLE IMPLEMENTATION

We aim to get you up and running within one month

DEDICATED DEVELOPERS

Our team continually add new features

COMPLETELY CUSTOMISABLE

You are in total control of your processes and data

FUTURE PROOF YOUR BUSINESS

The system evolves as your business grows

BESPOKE SOFTWARE SOLUTIONS

We can deliver custom development projects
